Introduction

“Play is our brain’s favorite way to learn” - Diane Ackerman

We would like to thank you for purchasing this book personally. **Fun Riddles and Trick Questions for Kids and Family!** is a collection of 300 fun brain teasers and riddles of easy to hard difficulty.

These brain teasers will challenge children and their parents to think and stretch their minds. They also have many other benefits, such as:

- **Bonding** – It is an excellent way for parents and their children to spend some quality time and create some fun and memorable memories.
- **Confidence Building** - When parents give the riddles, it creates a safe environment for children to burst out with the answers even if they are incorrect. This helps children to develop self-confidence in expressing themselves.
- **Improve Vocabulary** – Riddles are usually written in advanced words; therefore, children will need to understand these words before they can share the riddles.
- **Better reading comprehension** – Many children can read at a young age but may not understand the context of the word. Riddles can help develop the children’s interest in comprehending the context before they can share them with their friends.
- **Sense of humor** –Funny, creative riddles can help children develop their sense of humor while getting their brains working.

Navigating between questions and answers.

This book is formatted to make reading convenient. For each question, click on “Answer” to reveal the answer. Then you can click “Back” to return to the question, or “Next Riddle” for the next question.

Chapter 1: Easy Riddles

“Play gives children a chance to practice what they are learning” – Mr. Rogers

1. Cheese backwards

What cheese is made backward?

[Answer](#)

2.Length and time

I'm short when I'm old, but tall when I'm young. What am I?

[Answer](#)
